CHECKLIST**

YOUR LAST LINE OF DEFENCE®

Always be ready for an accident.

Make sure that:

- There is no damage to any seams.
- All zips are closed: there is a zip on the jacket that must be closed underneath the Velcro.
- The Velcro still holds fast and closed.
- There are no tears, rips or thread bear areas on the suit.
- The garment is clean and clear of any residue (e.g. oil).

HEAD:

- Is your Face Shield down?
Ensure your Face Shield is down before commencing work.
- Are you wearing your balaclava?
- Check date of manufacture on the hood:
Shield needs to be replaced every 2 years (green shield) and every 5 years (grey shield).
On each hood there is a serial number with date of manufacture (10 digit number that starts with the year, month and day it was manufactured).

HANDS:

- Are you wearing gloves?
- Ensure there is no skin visible between where your gloves end and the shirt starts.
- Are the gloves also arc rated, fit for purpose?

TORSO:

- Are you wearing a long sleeve shirt or conti-jacket?
- Are your arms and neck covered?
Ensure sleeves are rolled down, and all buttons/Velcro/press studs are correctly fastened.
- Is your shirt Arc rated?
Check the cal rating on the shirt to ensure that you are safe. Position on shirt typically on the left breast pocket.

LEGS:

- Is your skin exposed?
Ensure your trousers cover your legs all the way to your boot.
- Is your zip closed?

FEET:

- Make sure you're wearing the appropriate safety boots.

PREPARATION IS THE BEST DEFENCE.
